Ultra-lightweight Bluetooth® headset - **ACTIVAIR2**

THE ULTRA-LIGHTWEIGHT WIRELESS HEADSET WITH AIR CONDUCTION TECHNOLOGY

The ACTIVAIR2 headset is the perfect companion for optimal comfort and productivity. Ultra-light at just 21 grams, you'll completely forget you're wearing it. Its over-the-air sound transmission technology allows you to stay perfectly connected to your surroundings, even when the ACTIVAIR2 is on your ears. It doesn't obstruct your ears, allowing you to seamlessly transition from a phone call to a conversation around you. The microphone features dual microphones, including an external microphone with advanced ENC noise reduction technology. This eliminates background noise and conversations around you, ensuring your caller hears you perfectly. Three buttons—multifunction, volume up, and volume down—are easily accessible directly under the right earcup. Features such as play/pause for your media content are available with a simple press of the main button. For charging, the ACTIVAIR2 is equipped with a USB-C port. Its 13-hour battery life allows you to complete all your tasks for several working days.
