ENERGY BONE Conduction LIGHT sports headphones

COMBINE MOTIVATION AND SECURITY

Discover the ENERGY LIGHT sports earphones, your infallible ally for unparalleled performance!

The ENERGY LIGHT earphones are essential for taking your workout to the next level. With their bone conduction design, enjoy your music while remaining open to the world around you and any hazards you might encounter. The sound is transmitted by vibration through the temporal bone, directly to the inner ear. The result: you enjoy clear sound in any environment, and your ears remain free to be aware of your surroundings.

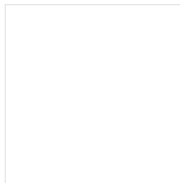

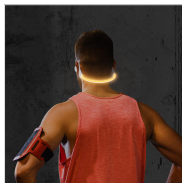

The neckband features an LED strip, which responds to a flashing or continuous light mode. Alert everyone around you, even at night, and ensure your safety.

With their ergonomic design and ultra-light weight of only 28 grams, they offer optimal comfort and stay in place during your most intense workouts.

With IPX4 certification, they are resistant to splashes, sweat, and rain. Train without constraints, whatever the weather conditions, these earphones accompany you in all your efforts.

The intuitive integrated controls allow you to easily control music and calls, while the battery ensures you listen uninterrupted for 15 hours (between 9 and 10 hours with the light activated, at 70% volume)!

Don't let anything stop you, enjoy your music to the fullest with the ENERGY LIGHT earphones.

BOX CONTENTS

1 x ENERGY LIGHT earphones
1 x USB-C cable
