14" RGB LED Ring Light with Tripod for Studio - INFLUENCE PRO

A COMPLETE PACK TO SET UP YOUR STUDIO

This complete pack is the essential accessory for your studio, to record your videos like a pro.

The ring light, with a diameter of 14", allows for an even diffusion of light, which avoids differences in contrast and thus leaves no visible shadows on the shot. The smartphone holder is flexible and therefore adjustable for optimal placement. In addition, the holder is placed in the center of the ring. Thus, the light is emitted equally all around the lens, which allows for a clear and balanced brightness at all angles. The ring has an integrated control joystick, which allows you to turn it on and off, navigate between the 3 white light options (warm white, neutral white and cold white) and 6 different RGB colors (red, green, blue, yellow, purple, cyan), as well as adjust the brightness level. A Bluetooth controller is included, in order to control the device and take your photos remotely. The ring is placed on a metal tripod with a maximum height of 160 cm, whose angle is adjustable to place it at the right height. In addition, it has a 90° rotating head to direct the light as you wish. The light ring is powered by the attached USB cable.

BOX CONTENTS
