## 12" LED ring RGB with tripod for studio - INFLUENCE

### A FULL PACK TO SETUP ONE'S OWN STUDIO

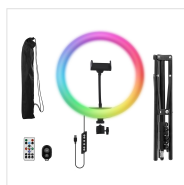

This complete pack is the essential accessory for your studio, to record your videos like a pro.

The ring of light, with a diameter of 12", allows uniform light diffusion, which avoids differences in contrast and thus leaves no visible shadow on the plane.

The smartphone holder is flexible and therefore adjustable for optimal placement. Additionally, the support is placed in the center of the ring. This ensures that light is emitted evenly all around the lens, providing crisp, balanced brightness at all angles. The ring has a built-in controller, which allows you to turn it on and off, navigate between the 3 white light options (warm white, neutral white and cool white) and 6 different RGB colors (red, green, blue, yellow, purple, cyan), as well as adjust the brightness level.

A remote control is provided to be able to control the light at distance. A Bluetooth photo shutter remote control is included, so you can take your photos remotely.

The ring is placed on a metal tripod with a maximum height of 160 cm, the angle of which is adjustable in order to place it at the right height.

### BOX CONTENTS
