

## ELYGHT - Monitor Backlight

### FOR GREATER IMMERSION IN YOUR CONTENT

The Elyght is a smart RGB LED light specially designed to transform your viewing experience by adapting to the content on your screen. Thanks to its real-time synchronization, it adjusts the lighting based on the colors and on-screen activity, providing total immersion for work, leisure, or gaming. With several modes available, it adapts to all your desires: Gaming mode creates an intense and dynamic atmosphere, Movie mode adds a cinematic touch to your viewing sessions, and Music mode synchronizes the light with the rhythm of your music. A Creative mode is also available to customize the lighting effects to your needs. In addition to providing an immersive experience, the Elyght is designed to protect your eyes with pure, adjustable light that reduces eye strain. Installation is simple and flexible. The Elyght can be mounted directly onto standard VESA mounting holes (75x75 mm or 100x100 mm) for PC monitors or used with a laptop stand, offering multiple options to suit your work or entertainment space. A dedicated app provides full control over the light, allowing you to choose from 16 million colors, adjust the brightness, or customize the lighting to your preferences. With its compact dimensions of 300x200x21 mm, USB power (5V/2A), and a power consumption of only 10W, the Elyght is compatible with 13- to 17-inch laptop screens and 24- to 32-inch PC monitors. It works with both Windows and macOS. Treat yourself to a unique and immersive experience with the Elyght, the PC light that revolutionizes your multimedia environment.
