

ROPE - CABLE JACK / JACK 6.35 2M

ENJOY YOUR MUSIC IN THE BEST WAY!

Versatility: Jack to Jack 6.35 cables are widely used in the music industry and are compatible with a wide variety of audio equipment, such as electric guitars, amplifiers, speakers, mixers and audio interfaces.

Length: With a length of 2 meters, the cable allows a certain flexibility in the installation and the location of the devices.

Superior Audio Quality: Are designed to minimize electromagnetic interference, noise and signal loss. They thus enable high-quality audio transmission, with extended frequency response and minimal distortion.

Flexibility: Cotton cables are softer and more flexible than plastic cables, making them easier to handle and store. They can be easily rolled up and unrolled without any risk of twisting or tangling.

Aesthetics: Cotton cables have a more elegant appearance than traditional plastic cables.
