

Magnetic support for on-board computer

YOUR MAGSAFE ROTATING PHONE HOLDER, IDEAL FOR ALL TESLA MODELS!

Discover our dedicated Tesla car mount, to keep your phone within reach and sight during your daily commute.

This mount attaches to the corner of your onboard computer and adapts to any computer size.

Thanks to its adjustable mount, this mount is compatible with all existing Tesla models: Tesla Model 3, Tesla Model X, Tesla Model Y, and Tesla Model S.

Avoid scratches or bumps thanks to the silicone insert that protects your onboard computer and prevents direct contact with the mount.

Its rotating arm allows you to adjust the mount's angle 180°, allowing you to adapt the mount to your needs and preferences.

The mount head also rotates, allowing you to maintain an optimal driving position and adapt it to suit the driver.

The mount head is compatible with MagSafe technology and securely holds your smartphone. Don't have MagSafe technology? No problem, we provide you with a metal adhesive plate to stick on your phone case.

BOX CONTENTS
