

15W Premium Induction Charging Stand for Tesla

FAST WIRELESS CHARGING IN A COMPACT STAND!

Discover our support dedicated to Tesla cars, to keep your phone within reach and in sight during your daily journeys.

This support attaches to the corner of your on-board computer and adapts to each computer format.

Thanks to its adjustable attachment, this support is compatible with all existing Tesla models: Tesla Model 3, Tesla Model X, Tesla Model Y and Tesla Model S.

Avoid any scratches or shocks thanks to the addition of silicone that protects your on-board computer and avoids direct contact with the support.

Its rotating arm allows you to change the angle of the support to 180 °, allowing you to adapt the support to your needs and desires.

The support head is also rotatable and allows you to have an optimal position when driving but also to adapt according to the driver.

Recharge your smartphone thanks to this motorized support including fast wireless charging.

Designed for use in cars/trucks, wireless charging is automatically activated with compatible Smartphones (equipped with an induction receiver or a wireless charging case).

The holder is powered by a USB-C cable connected to the supplied 1-port QC 3.0 USB cigarette lighter charger (turbo charge).

It offers a 15W turbo wireless charge. Equipped with a capacitor, you will be able to open and close the holder once the car's power is off.

At the back, a button allows you to open and close the holder, in which you can position a smartphone up to 7". The rotating head allows you to tilt your smartphone in both portrait and landscape mode.

Compact and modern, this holder is the PREMIUM ally for your journeys!
