

PREMIUM - CABLE TOSLINK M/M 3M

TRANSMISSION OF HIGH QUALITY DIGITAL AUDIO SIGNALS

Superior Audio Quality: The TOSLINK cable uses an optical connection to transmit digital audio signals, which eliminates electromagnetic interference and provides superior audio quality. This makes it a good choice for audio professionals looking to ensure optimum sound quality.

Extended Length: The 3 meter TOSLINK M/M cable provides sufficient length for audio connections in recording studios or concert halls. This length allows audio equipment to be connected at a reasonable distance without the need to use extension cords or additional adapters.

Universal Compatibility: The TOSLINK cable is compatible with a variety of digital audio equipment, including CD players, game consoles, set-top boxes and amplifiers. This makes it a practical and versatile choice for audio professionals.

Reliability: The TOSLINK cable is resistant to electromagnetic interference and signal disturbances, which guarantees stable and reliable audio transmission.
