

The universal support that will follow you everywhere!

THE UNIVERSAL DASHBOARD MOUNT

This dashboard phone mount is compatible with most phones between 6 and 14 mm thick. Before use, ensure your device does not exceed this thickness. Thanks to its 360° rotation and adjustable tilt of up to 30°, you can adjust the position of your phone to reduce light reflections on the screen and ensure optimal visibility. Easy and efficient installation:

- Thoroughly clean the dashboard surface (flat, clean, and dry).
- Remove the protective film from the adhesive.
- Position the mount in the desired location.
- Let it sit for 8 hours before use for optimal adhesion.

This mount is also repositionable: simply rinse it with clean water, dry it, and then reposition it.

Practical details:

- Anti-scratch silicone: Built-in protectors protect your phone from abrasions and scratches.
- Built-in cable management: Keeps your charging cable securely in place and avoids clutter.

This stand can also be used at home on any smooth, clean surface.
