

## E-scooter transport universal strap

### CARRY YOUR E-SCOOTER OVER THE SHOULDER

Simplify your life and transport your scooter with this universal strap. Fold the scooter, hang the two carabiners at both ends on two solid pins. You can thus carry your scooter over the shoulder.

This is ideal for carrying it, storing it or taking public transport.

The strap has been designed to ease the setting up and handling, without forgetting the comfort of use.

It has a shoulder pad with massage nubs and helps to balance the weight distribution between the front and the back, to prevent pain, what makes its use accessible to all.

The length of the strap is adjustable to adapt to all scooters and all body types.
