

Bluetooth FM transmitter

STREAM YOUR MUSIC AND PHONE CALLS ON THE FM BAND.

This FM transmitter streams your music and phone calls directly to your car radio's FM band, even if it doesn't have a Bluetooth or auxiliary input. It's a simple and effective solution for enjoying your audio content in the car.

When this product is turned off and restarted, the Bluetooth automatically reconnects to your mobile phone and the FM frequency is memorized. It will automatically reconnect to your mobile phone, remember the FM frequency, and replay the music last played on the USB flash drive before the device was turned off.

The transmitter is equipped with two charging ports: a USB-C port: fast charging up to 15W and a USB-A port: standard charging at 5W.

The transmitter includes a vehicle battery voltage monitoring system, allowing for rapid detection of any abnormalities.

It's the ideal accessory for upgrading your in-car audio system at a lower cost.

Enjoy a quality listening experience on the go.

Key Features:

Audio Streaming: Play music via USB flash drive or Bluetooth connection.

FM Frequency: 87.5-108.0 MHz
